Subject: RE: Follow-up on meeting re Joan Boice

Hi Kathleen:

I just met with the nurse from Kaiser Home Health. I did receive a Care Alert for Joan from over the long weekend regarding other areas that are problematic. The HH RN will call Misty and I am sure she will be contacting you regarding moving Joan to a Skilled Nursing Facility. Joan's right foot wound is still coming along, but not as quickly as we would like. She also has a fluid filled area on the right inner arm at the elbow area, a scar covered area on the left heel that is healing, but if the scar comes off it would require wound care, and she has a reddened area on her hip that I did not observe. So, all in all, I think Misty will be advising skilled care for Joan and I can't say I disagree with that. I have spoken to my supervising regional nurse and she feels that Joan needs a higher level of care as well. I have a call out to Misty to confirm what will take place and I will communicate anything I hear from her to you as well.

Thank you,

Peggie Stevenson, R.N.
